

Mohannad Saif

Sawan, 40th Street, Sana'a | +967 734 402 398 | workmondoue@gmail.com

Github: github.com/Mondoue | **LinkedIn:** [linkedin.com/in/mohannad-saif-a8b4b5394/](https://www.linkedin.com/in/mohannad-saif-a8b4b5394/)

Profile

A dedicated cybersecurity student with a strong foundation in web design, networking, and security principles. With strong problem-solving skills and excellent Quality Assurance

Education

High School Diploma Al-Raid School Sana'a	2018 - 2020
Bachelor of Science in Cybersecurity University of Science & Technology Sana'a	Sep 2023 - Present

Projects

E-Commerce Website

github.com/Mondoue/Web-Design-Project

- Coordinated a group of four students and helped divide **project tasks**
- Took charge of **back-end database Integration**
- Assisted with front-end website **UI/UX** implementation

Secure Shopping Website

<https://github.com/Mondoue/Secure-Programming-Flask>

- Migrated a static **HTML/CSS** website to the **Flask** framework
- Applied common **web security principles** such as **input validation** and **access control**

Pharmaceutical Delivery App: PharmaGO

<https://github.com/Mondoue/PharmaGo>

- Developed a **proof-of-concept Pharmaceutical Delivery Application**.
- Designed and implemented the **complete database schema** for the system
- Designed and developed **multiple user interfaces**, including **Customer, Driver, and Pharmacy dashboards**

Educational Security Assessment Platform: FulScan

<https://github.com/Mondoue/FulScan>

- Developed a **proof-of-concept educational security assessment** application in Python to automate introductory **security testing** workflows.
- Designed and implemented the application architecture and scan execution workflow for target-based assessments
- Integrated multiple **security tools** (e.g., **Nmap, WhatWeb, Gobuster, SSLScan**) using **Python subprocess automation**.
- Built **output processing** and **reporting** functionality to organize **scan results** into structured **assessment reports**.

Courses

• International Computer Driving License (ICDL) – Word Processing, Spreadsheets, Presentation, IT Security	Aug 2023
CCNA 1: Introduction to Networks (ITN)	Aug 2023
CCNA 2: Switching, Routing, and Wireless Essentials (SRWE)	Nov 2024
CCNA 3: Enterprise Networking, Security, and Automation (ENSA)	Jun 2025

Skills & abilities

Languages: Fluency in **Arabic** and **English**.

Programming Languages: Highly skilled in **Java, C#, and Python**.

Computer Hardware: Knowledgeable in assembling, troubleshooting, and maintaining PC components, including CPUs, GPUs, motherboards, storage devices, and peripherals.

Penetration Testing & Security: Skilled in identifying system vulnerabilities, performing ethical hacking, and implementing security measures to protect networks and applications.

Web Design: Creating visually-appealing user-friendly websites using **HTML, CSS**, and design tools like **Figma**, focusing on clean layouts and simple user experience.

Secure Web Development: Understanding of secure coding practices for web applications, including input validation, authentication, authorization, and protection against common vulnerabilities (e.g., SQL injection, XSS).

Databases: Strong knowledge of relational and non-relational databases, including **MySQL, Oracle**, and **NoSQL** systems, with experience in data modeling, querying, and optimization.

Version Control (GitHub): Experience using Git and GitHub for source code management, basic branching, pull requests, and collaboration on student projects.

Computer Networking: Understanding of computer networking fundamentals, including TCP/IP, OSI model, LAN/WAN, routing, switching, and basic network troubleshooting.

Project Management: Familiar with basic project management principles, including planning, task scheduling, teamwork, and meeting deadlines in academic and group projects.

Program Design: Ability to design and structure programs using fundamental software design principles, algorithms, and data structures to solve problems efficiently.

Quality Assurance: Familiar with software quality assurance principles, including basic testing methods, bug reporting, and ensuring functionality meets requirements in academic projects.
